**ACCOUNTING OFFICER'S RESPONSIBILITIES AND APPROVAL**

---

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are responsible for reporting on the fair presentation of the annual financial statements.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practices (GRAP). The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges ultimate responsibility for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or loss in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or loss.

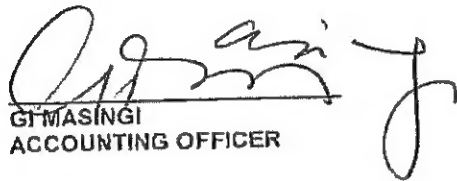

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2012 and, in the light of this review and the current financial position, is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the service charges and grants for continued funding of operations. The annual financial statements are prepared on the basis that the municipality is a going concern and that the Greater Giyani Municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**

The Accounting Officer further certifies that the remuneration of councillors as disclosed in the relevant note to the financial statements is in accordance with the Public Office Bearers Act (Act 20 of 1998) and the Minister of Co-operative Governance and Traditional Affairs' determination of upper limits of the salaries, allowances and benefits as promulgated annually.

The annual financial statements set out on pages 5 to 50, which have been prepared on the going concern basis, were approved on 31 August 2011 and were signed on behalf of the Municipality by:

  
G. MASINGI  
ACCOUNTING OFFICER

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**ACCOUNTING POLICIES**

**1. Presentation of Annual Financial Statements**

The annual financial statements have been prepared in accordance with South African Statements of Generally Recognised Accounting Practice (GRAP) issued by the Accounting Standards Board in accordance with the Municipal Finance Management Act (Act 56 of 2003). These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise. They are presented in South African Rand. These accounting policies are consistent with the previous period.

**1.1 Significant Judgements**

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual statements and related disclosure. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements.

**Use of estimates**

The preparation of financial statements in conformity with Generally Recognised Accounting Practice requires the use of certain of critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Municipality's accounting policies. The area involving a higher degree of judgement or complexity, or area where assumptions and estimates are significant to financial statements are disclosed in the relevant sections of the financial statements. Although these estimates are based on management's best knowledge of current events and actions they may undertake in the future, actual results ultimately may differ from those estimates.

**1.2 Presentation of Currency**

These annual financial statements are presented in South African Rand.

**1.3 Going concern assumption**

These annual financial statements have been prepared on a going concern basis.

**1.4 Property, plant and equipment**

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period. Property, plant and equipment is initially measured at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Where an asset is acquired at no cost, or for a nominal cost, its cost is its fair value as at date of acquisition. Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses except for infrastructure assets which is carried at re-valued amount being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**

**ACCOUNTING POLICIES**

When an item of property, plant and equipment is re-valued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the re-valued amount of the asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings as the asset is used. The amount transferred is equal to the difference between depreciation based on the re-valued carrying amount and depreciation based on the original cost of the asset.

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value. The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Average useful life
Buildings	30
Plant and equipment	2-15
Motor vehicles	4-7
Office equipment	3-7
IT equipment	3-5
Community halls	30
Roads, pavements, bridges and storm water	10-30
Security measures	3-10
Libraries	30
Car parks, bus terminals and taxi ranks	20
Street lighting	20-25
Refuse sites	30
Fire services	30
Clinics	30
Cemeteries	30
Park and gardens	10-30
Street names, signs and parking meters	5
Sport fields	10-30
Specialised vehicles	15
Water meters	7
Sewerage purification and reticulation	15-20
Water reservoirs and reticulation	15-20
Housing	30
Electricity reticulation	15-30

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. The depreciation charge for each period is recognised in surplus or deficit.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**

**ACCOUNTING POLICIES**

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising from de-recognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the de-recognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. These assets are not accounted for as non-current assets held for sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

**Exemptions**

The municipality has adopted Directive 4 issued by the Accounting Standards Board in March 2009, paragraph .71 to .83, which allows a period of 3 years from the date of initial adoption of GRAP 17 to comply in full with the recognition requirements of the standard.

**1.5 Financial instruments**

**Classification**

The municipality classifies financial assets and financial liabilities into the following categories: Classification depends on the purpose for which the financial instruments were obtained/ incurred and takes place at initial recognition. Classification is re-assessed on an annual basis, except for derivatives and financial assets designated as at fair value through surplus or deficit, which shall not be classified out of the fair value through surplus or deficit category.

**Trade and other receivables**

A provision for impairment is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of receivables. Significant financial difficulties of the debtor and default or delinquency in payments of all debt outstanding for more than 120 days are considered indicators that the trade receivables are impaired. Bad debts are written off during the year in which they are identified as irrecoverable, which may not be the date on which the provision is raised.

**Trade and other payables**

Trade creditors are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method.

**Cash and cash equivalents**

Cash includes cash on hand and cash with banks. Cash equivalents are short-term investments that are held with registered banking institutions with maturities of 32 days or daily calls. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks and investments in financial instruments, net of bank overdrafts. Bank overdrafts are recorded on the facility utilised. Finance charges on bank overdrafts are expensed as incurred.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**ACCOUNTING POLICIES**

**Bank overdraft and borrowings**

Bank overdrafts and borrowings are initially measured at cost, and are subsequently measured at amortised cost, using the effective interest rate method. Any difference between the proceeds (net of transaction costs) and the settlement or redemption of borrowings is recognised over the term of the borrowings in accordance with the municipality's accounting policy for borrowing costs.

**1.6 Investments held-to-maturity**

Subsequent to initial recognition, held-to-maturity assets are measured at amortised cost calculated using the effective interest method. Investments which include listed government bonds, unlisted municipal bonds, fixed deposits and short term deposits invested in registered banks are stated at cost.

Where investments have been impaired, the carrying value is adjusted by the impairment loss and this is recognised as an expense in the period that the impairment is identified.

Surplus funds are invested in terms of Council's Investment Policy. Investments are only made with financial institutions registered in terms of the Deposit Taking Institutions Act of 1990 with an A1 or similar rating institution for safe investment purposes. The investment period should be such that it will not be necessary to borrow funds against the investments at a penalty interest rate to meet commitments.

**1.7 Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments. They are included in current assets, except for maturities in excess of 12 months which are classified as non-current assets.

Loans and receivables are recognised initially at cost which represents fair value. After initial recognition financial assets are measured at amortised cost using the effective interest rate.

**1.8 Leases**

**Operating leases – lessee**

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease payments or receipts are recognised on the basis of the actual cash inflows and outflows.

**1.9 Inventories**

The cost of inventories comprises of all costs of purchase, costs of development, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Consumable stores, raw materials, work in progress, unused water, and finished goods are valued at the lower of cost and net realisable value. In general, the basis of determining cost is the weighted average cost of commodities.

Redundant and slow-moving stock are identified and written down with regard to their estimated economic or realisable values and sold following the municipality's approved disposal strategy. Consumables are written down with regard to age, condition and utility.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**

**ACCOUNTING POLICIES**

Unsold properties are valued at the lower of cost and net realisable value on a specific identification cost basis. Direct costs are accumulated for each separately identifiable development. Costs also include a proportion of overhead costs.

**1.10 Turnover**

Turnover comprises the invoiced values of the consideration received or receivable for the sale of goods and services in the ordinary course of the Municipality's activities. Revenue is shown net of value added tax, rebates and discounts and after eliminated revenue within departments of the Municipality.

**Revenue from Exchange Transactions**

Service charges relating to water are based on consumption. Meter readings are taken on a monthly basis and are recognised as revenue when invoiced. Provisional estimates are not used to estimate the revenue.

Revenue from sale of goods is recognised when the risks and rewards of ownership are passed to purchaser. Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant gazetted tariff. This includes the issuing of licences and permits.

Interest and rentals are recognised on a time proportion basis. Income for agency services is recognised on a monthly basis once the income collected on behalf of agents has been quantified. The income recognised is in terms of the agency agreement.

Revenue from public contributions is recognised when all conditions associated with the contribution have been met. Where public contribution has been received but municipality has not met the condition, a liability is recognised.

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Adjustments or interim rates are recognised once the municipal valuer has valued the change to properties.

Collection charges are recognised when such amounts are legally enforceable.

Fines constitute both spot fines and summons. Revenue from spot fines and summons is recognised when payment is received.

Donations are recognised on a cash receipt basis or where the donation is in the form of property, plant and equipment at the fair value of the consideration received or receivable. Contributed property, plant and equipment is recognised when the deed of transfer is signed or when title of the items of property, plant and equipment is transferred to the Municipality, whichever happens first.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**

**ACCOUNTING POLICIES**

**1.11 Provisions and contingencies**

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date. Where the effect of time value of money is material, the amount of a provision is the present value of the expenditure expected to be required to settle the obligation. The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation. A provision is used only for expenditure for which the provision was originally recognised. Provisions are not recognised for future operating deficits.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision. No obligation arises as a consequence of the sale or transfer of an operation until the municipality is committed to the sale or transfer, that is, there is a binding agreement.

After their initial recognition contingent liabilities recognised in business combinations that are recognised separately are subsequently measured at the higher of:

- o the amount that would be recognised as a provision; and
- o the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note.

**1.12 Conditional Grants and receipts**

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is raised.

**1.13 Unauthorised expenditure**

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act 56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

**1.14 Irregular expenditure**

Irregular expenditure is expenditure that is contrary to the Municipal Finance Act (Act 56 of 2003), the Municipal Systems Act (Act 32 of 2000), Remuneration of Public Office Bearers Act (Act 20 of 1998) or is in contravention of the municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**ACCOUNTING POLICIES**

**1.15 Fruitless and wasteful expenditure**

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

**1.16 Comparative figures**

Actual prior year amounts have been included in the annual financial statements for the current financial year only. When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are reclassified. The nature and reason for the reclassification is disclosed.

**1.17 Employee benefits**

**Short-term employee benefits**

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

**Defined contribution plans**

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to Municipal Employees Pension Fund, Municipal Gratuity Fund and SAMWU Provident Fund-managed retirement benefit schemes are dealt with as defined contribution plans where the municipality's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan. Councillors are members of the Municipal Councillors Pension Fund that was established in terms of the Remuneration of the Public Office Bearers Act 1998 (Act 20 of 1998).

Obligations for contributions to defined contribution plans are recognised as an expense in the income statement as incurred. Contributions to the defined contribution pension plan in respect of service in a particular period are included in the employees' total cost of employment and are charged to the statement of financial performance in the year to which they relate as part of cost of employment.

**1.18 Borrowing costs**

All other borrowing costs are recognised as an expense in the period in which they are incurred.

Capitalisation ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete. When the municipality completes the construction of a qualifying asset in parts and each part is capable of being used while construction continues on other parts, the entity ceases capitalising borrowing costs when it completes substantially all the activities necessary to prepare that part for its intended use or sale.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**ACCOUNTING POLICIES**

**1.19 Consumer Deposits**

Consumer deposits are a partial security for a future payment of an account. All consumers are therefore required to pay a deposit equal to two months consumption of electricity and water services. Deposits are considered a liability as the deposit is only refunded once the service is terminated. No interest is paid on deposits as the GGM is not a deposits taking institution in terms of Banking Act. For the current financial period consumer deposits have been waived by council decision.

**1.20 Events after balance sheet date**

Recognised amounts in the financial statements are adjusted to reflect events arising after the balance sheet date that provide evidence of conditions that existed at the balance sheet date. Events after the balance sheet date that are indicative of conditions that arose after the balance sheet date are dealt with by way of a note to the financial statements.

**1.21 Value Added Tax**

VAT is payable on the receipts basis. Only once the payment is received from debtors is VAT paid over SARS.

**1.22 Impairment of cash-generating assets**

Cash-generating assets are those assets held by the municipality with the primary objective of generating a commercial return.

When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets held with the primary objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable amount of an asset or a cash-generating unit is the higher its fair value less costs to sell and its value in use.

Useful life is the period of time over which an asset is expected to be used by the municipality.

**Revenue from exchange transactions**

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**ACCOUNTING POLICIES**

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

**1.23 Offsetting**

Assets, liabilities, revenue and expenses have not been offset.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

**2. New Standards and Interpretations**

**2.1 IFRIC 16 (AC 449) Hedges of a Net Investment in a Foreign Operation**

The interpretation deals with the following issues:

- o Presentation currency does not create an exposure to which an entity may apply hedge accounting.
- o Consequently, a parent entity may designate as a hedged risk only the foreign exchange differences arising from
- o a difference between its own functional currency and that of its foreign operation.
- o Any entity or entities within a group can hold a hedging instrument in a hedge of a net investment in a foreign
- o operation. The parent entity holding the net investment in a foreign operation therefore does not also have to hold the hedging instrument.
- o How an entity should determine the amounts to be reclassified from equity to profit or loss for both the hedging instrument and the hedged item when the entity disposes of the investment.
- o IAS 39 (AC 133) Financial Instruments: Recognition and Measurement must be applied to determine the amount that needs to be reclassified to profit or loss from the foreign currency translation reserve in respect of the hedging instrument, and IAS 21 (AC 112) The Effects of Changes in Foreign Exchange Rates must be applied in respect of the hedged item.

The effective date of the interpretation is for years beginning on or after 01 October 2008. The municipality has adopted the interpretation for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.2 IFRIC 15 (AC 448) Agreements for the Construction of Real Estates**

IFRIC 15 (AC 448) specifies whether an agreement for the construction of real estate is within the scope of IAS 11 (AC 109): construction Contracts or IAS 18 (AC 111): revenue, and thus impacts the related recognition of revenue. An agreement for the construction of real estate is a construction contract within the scope of IAS 11 (AC 109) only when the buyer is able to specify the major structural elements of the design of the real estate before construction begins and/or specify major structural changes once construction is in progress. Revenue in such cases should be determined in accordance with the percentage of completion of the contract. In all other cases, IAS 18 (AC 111) applies. If IAS 18 (AC 111) applies and the entity is required to provide the materials for the construction as well as carry out the construction activity, the supply represents the sale of goods. In such cases, revenue is recognised on delivery of the constructed asset. If the entity is not required to provide materials, but only to construct the real estate, the supply is the rendering of services, and revenue should be recognised on the percentage of completion basis.

The effective date of the interpretation is for years beginning on or after 01 January 2009. The municipality has adopted the interpretation for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

**2.3 IFRS 2 (AC 139) Amendment: IFRS 2 – Share-based Payment: Vesting Conditions and Cancellations**

The amendment clarifies that vesting conditions are only performance conditions or service conditions. All other conditions are non-vesting conditions. Non-vesting conditions are accounted for in the same manner as market conditions. It further clarifies that if either party can choose not to satisfy a non-vesting condition, then the arrangement is treated as a cancellation upon non fulfilment of that condition.

The effective date of the amendment is for years beginning on or after 01 January 2009. The municipality has adopted the amendment for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.4 IAS 32 (AC 125) Financial Instruments: Presentation and IAS 1 (AC 101) Presentation of Financial Statements Amendment: Puttable Financial Instruments and obligations Arising on Liquidation**

The revision requires that certain puttable financial instruments and other instruments that impose on the entity an obligation to deliver a pro rata share of the net assets of the entity on liquidation should be classified as equity if certain conditions are met. Any classifications of such items are to be disclosed in the financial statements, together with information concerning the entity's objectives and policies with regards to managing such obligations.

The effective date of the standard is for years beginning on or after 01 January 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.5 May 2008 Annual Improvements to IFRS's: Amendments to IFRS 7 (AC 144) Financial Instruments: Disclosures**

The amendment relates to changes in the Implementation Guidance of the Standard. 'Total interest income' was removed as a component of finance costs from paragraph IG13. This was to remove inconsistency with the requirement of IAS 1 (AC 101) Presentation of Financial Statements which precludes the offsetting of income and expenses.

The effective date of the amendment is for years beginning on or after 01 January 2009. The municipality has adopted the amendment for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**

**NEW STANDARDS AND INTERPRETATIONS**

**2.6 May 2008 Annual Improvements to IFRS's: Amendments to IAS 19 (AC 116)**  
**Employee Benefits**

With regards to curtailments and negative past service costs clarification has been made that:

- o When a plan amendment reduces benefits, the effect of the reduction for future service is a curtailment and the effect of any reduction for past service is a negative past service cost;
- o Negative past service cost arises when a change in the benefits attributable to past service results in a reduction in the present value of the defined benefit obligation; and
- o A curtailment may arise from a reduction in the extent to which future salary increases are linked to the benefits payable for past service.

The definition of 'return on plan assets' has also been amended to require the deduction of plan administration costs only to the extent that such costs have not been reflected in the actuarial assumptions used to measure the defined benefit obligation. The term "fall due" in the definition of "short term employee benefits" has been replaced with "due to be settled".

The effective date of the amendment is for years beginning on or after 01 January 2009. The municipality has adopted the amendment for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.7 May 2008 Annual Improvements to IFRS's: Amendments to IFRS 7 (AC 144)**  
**Financial Instruments: Disclosures; IAS 32 (AC 125) Financial Instruments:**  
**Presentation; IAS 28 (AC 110) Investments in Associates and IAS 31 (AC 119)**  
**Interests in Joint Ventures**

The amendment adjusted the disclosure requirements of investments in associates and interests in joint ventures which have been designated as at fair value through profit or loss or are classified as held for trading. The amendment provides that only certain specific disclosure requirements of IAS 28 (AC 110) Investments in Associates and IAS 31 (AC 119) Interests in Joint Ventures are required together with the disclosures of IFRS 7 (AC 144) Financial Instruments: Disclosures; IAS 32 (AC 125) Financial Instruments: Presentation.

The effective date of the amendment is for years beginning on or after 01 January 2009. The municipality has adopted the amendment for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.8 May 2008 Annual Improvements to IFRS's: Amendments to IAS 36 (AC 128)**  
**Impairment of Assets**

The amendment requires disclosures of estimates used to determine the recoverable amount of cash-generating units containing goodwill or intangible assets with indefinite useful lives. Specifically, the following disclosures are required when discounted cash flows are used to estimate fair value less costs to sell:

- o The period over which management has projected cash flows;
- o The growth rate used to extrapolate cash flow projections; and
- o The discount rate(s) applied to the cash flow projections.

The effective date of the amendment is for years beginning on or after 01 January 2009.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

The municipality has adopted the amendment for the first time in the 2010 annual financial statements. The interpretation has no impact on the accounting policies already adopted.

**2.9 May 2008 Annual Improvements to IFRS's: Amendments to IAS 39 (AC 133)**  
**Financial Instruments: Recognition and Measurement**

IAS 39 (AC 133) prohibits the classification of financial instruments into or out of the fair value through profit or loss category after initial recognition. The amendments set out a number of changes in circumstances that are not considered to be reclassifications for this purpose. The amendments have also removed references to the designation of hedging instruments at the segment level. The amendments further clarify that the revised effective interest rate calculated when fair value hedge accounting ceases, in accordance with paragraph 92 IAS 39 (AC 133) should be used for the re-measurement of the hedged item when paragraph AG8 of IAS 39 (AC 133) is applicable.

The effective date of the amendment is for years beginning on or after 01 January 2009. The municipality has adopted the amendment for the first time in the 2010 annual financial statements. The interpretation has no impact on the current financial statements.

**2.10 IAS 36 (AC 128) Impairment of Assets: Consequential amendments**

Under certain circumstances, a dividend received from a subsidiary, associate or joint venture could be an indicator of impairment. This occurs when:

- o Carrying amount of investment in separate financial statements is greater than carrying amount of investee's net
- o assets including goodwill in consolidated financial statements or
- o Dividend exceeds total comprehensive income of investee in period dividend is declared.

The effective date of the amendment is for years beginning on or after 01 January 2009. The municipality has adopted the amendment for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.11 IFRS 3 (AC 140) (Revised) Business Combinations**

The revisions to IFRS 3 (AC 140) Business combinations require:

- o Acquisition costs to be expensed.
- o Non-controlling interest to either be calculated at fair value or at their proportionate share of the net identifiable assets of the acquiree.
- o Contingent consideration to be included in the cost of the business combination without further adjustment to goodwill, apart from measurement period adjustments.
- o All previous interests in the acquiree to be remeasured to fair value at acquisition date when control is achieved in stages, and for the fair value adjustments to be recognised in profit or loss.
- o Goodwill to be measured as the difference between the acquisition date fair value of consideration paid, non-controlling interest and fair value of previous shareholding and the fair value of the net identifiable assets of the acquiree.
- o The acquirer to reassess, at acquisition date, the classification of the net identifiable assets of the acquiree, except for leases and insurance contracts.
- o Contingent liabilities of the acquiree to only be included in the net identifiable assets when there is a present obligation with respect to the contingent liability.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

The effective date of the standard is for years beginning on or after 01 July 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.12 IAS 12 (AC 102) Income Taxes – consequential amendments due to IAS 27 (AC 132) (Amended) Consolidated and Separate Financial Statements**

The amendment is as a result of amendments to IAS 27 (AC 132) Consolidate and Separate Financial Statements. The amendment refers to situations where a subsidiary, on acquisition date, did not recognise a deferred tax asset in relation to deductible temporary differences, because, for example, there may not have been sufficient future taxable profits against which to utilise the deductible temporary differences. If the deferred tax asset subsequently becomes recognisable, the amendment now requires that the deferred tax asset should be recognised against goodwill (and profit or loss to the extent that it exceeds goodwill), only if it results from information in the measurement period about circumstances that existed at acquisition date. No adjustment may be made to goodwill for information outside of the measurement period. The effective date of the amendment is for years beginning on or after 01 July 2009.

The municipality has adopted the amendment for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.13 May 2008 Annual Improvements to IFRS's: Amendments to IFRS 5 (AC 142) Non-current Assets Held for Sale and Discontinued Operations**

The amendment clarifies that assets and liabilities of a subsidiary should be classified as held for sale if the parent is committed to a plan involving loss of control of the subsidiary, regardless of whether the entity will retain a non-controlling interest after the sale.

The effective date of the amendment is for years beginning on or after 01 July 2009. The municipality has adopted the amendment for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.14 IAS 39 (AC 133) Financial Instruments: Recognition and Measurement - Amendments for eligible hedged items**

The amendment provides clarification on two hedge accounting issues:

- o Inflation in a financial hedged item and
- o A one sided risk in a hedged item.

The effective date of the amendment is for years beginning on or after 01 July 2009. The municipality has adopted the amendment for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.15 Amendment to IAS 39 (AC 133) and IFRS 7 (AC 144): Reclassification of Financial Assets**

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

The amendment permits an entity to reclassify certain financial assets out of the fair value through profit or loss category if certain stringent conditions are met. It also permits an entity to transfer from the available for sale category to loans and receivables under certain circumstances. Additional disclosures are required in the event of any of these reclassifications.

The effective date of the amendment is for years beginning on or after 01 July 2009. The municipality has adopted the amendment for the first time in the 2010 annual financial statements. The interpretation has no impact on the current financial statements.

**2.16 GRAP 4: The Effects of Changes in Foreign Exchange Rates**

The initial application of GRAP 4 will have no impact on the annual financial statements. The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions, requires retrospective application on the initial adoption of the Standard except for the acquisition of foreign operations.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospective application of the Standard.

The effective date of the standard is for years beginning on or after 01 April 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.17 GRAP 5: Borrowing Costs**

This Standard allows entities, in the exceptionally rare cases, to expense borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset. This applies when it is inappropriate to capitalise borrowing costs. It is inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirement of an entity directly to the nature of the expenditure to be funded i.e. capital or current. In such cases, an entity shall expense those borrowing costs related to a qualifying asset directly to the statement of financial performance. The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires that the Standard will only apply to borrowing costs incurred on qualifying assets where the commencement date for capitalisation is on or after the effective date of the Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires that the Standard will only apply to borrowing costs incurred on qualifying assets where the commencement date for capitalisation is on or after the effective date of the Standard.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires only prospective application of the Standard and only will apply to borrowing costs incurred on qualifying assets where the commencement date for capitalisation is on or after the effective date of the Standard.

The effective date of the standard is for years beginning on or after 01 April 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

## **GREATER GIYANI MUNICIPALITY**

**Annual Financial Statements for the year ended 30 June 2011**

### **NEW STANDARDS AND INTERPRETATIONS**

#### **2.18 GRAP 6: Consolidated and Separate Financial Statements**

GRAP 6 includes specific guidance on whether control exists and on power conditions to determine whether control exists in a public sector context – public sector entities need to consider impact of this guidance to determine whether an investment should be accounted for in accordance with GRAP 6. GRAP 6 includes specific guidance and explanatory material on the accounting of special purpose entities adopted from SIC 12 – SA specific public sector amendment. Public sector entities need to consider impact of this guidance to determine whether an investment should be accounted for in accordance with GRAP 6. The initial application of GRAP 6 will have no impact on the annual financial statements. The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions, requires retrospective application of the Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard for separate annual financial statements. For consolidated annual financial statements the result of initially adopting the Standard shall be recognised in the economic entity as an adjustment to the opening balance of accumulated surplus or deficit and comparative information need not be restated for the economic entity.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospective application of the Standard for separate annual financial statements. For consolidated annual financial statements the result of initially adopting the Standard shall be recognised in the economic entity as an adjustment to the opening balance of accumulated surplus or deficit and comparative information need not be restated for the economic entity.

The effective date of the standard is for years beginning on or after 01 April 2009.

The municipality has adopted the standard for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

#### **2.19 GRAP 7: Investments in Associates**

An associate is an entity in which the investor has significant influence and which is neither a controlled entity nor a joint venture of the investor. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control over those policies. The investor must exercise judgement in the context of all available information to determine if it has significant influence over an investee. An investor accounts for investments in associates in the consolidated annual financial statements using the equity method. The initial application of GRAP 7 will have no impact on the annual financial statements. The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions, requires retrospective application of the Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard for separate annual financial statements. Any adjustments required to annual financial statements as a result of initially applying the equity method shall be recognised as an adjustment to the opening balance of accumulated surplus or deficit of the period in which the Standard is adopted. Comparative information need not be restated in these annual financial statements.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospective application of the Standard for separate annual financial statements. Any adjustments required to annual financial statements as a result of initially applying the equity method shall be recognised as an adjustment to the opening balance of accumulated surplus or deficit of the period in which the Standard is adopted. Comparative information need not be restated in these annual financial statements.

The effective date of the standard is for years beginning on or after 01 April 2009.

The municipality has adopted the standard for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.20 GRAP 8: Interests in Joint Ventures**

GRAP 8 uses a different definition for joint venture and joint control – contractual arrangement has been replaced by binding arrangement (public sector amendment) – public entities need to review current arrangements to determine whether they fall within the scope of GRAP 8 as a result of the public sector amendment. Applying the definition of joint control as defined in this Standard may result in the identification of other entities that are also jointly controlled ventures in addition to those identified by complying with applicable legislation. GRAP 8 incorporates guidance adopted from SIC13 on Non-monetary Contributions by ventures issued by the IASB i.e. provisions for accounting for non-monetary contributions to a jointly controlled entity in exchange for an equity interest in the jointly controlled entity that is accounted for using either the equity method or proportionate consolidation. (Par.57-62). The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions, requires retrospective application of the Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard for separate annual financial statements. Any adjustments required to annual financial statements as a result of initially applying the equity or proportionate consolidation method shall be recognised as an adjustment to the opening balance of accumulated surplus or deficit of the period in which the Standard is adopted. Comparative information need not be restated in these annual financial statements.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospective application of the Standard for separate annual financial statements. Any adjustments required to annual financial statements as a result of initially applying the equity or proportionate consolidation method shall be recognised as an adjustment to the opening balance of accumulated surplus or deficit of the period in which the Standard is adopted. Comparative information need not be restated in these annual financial statements.

The effective date of the standard is for years beginning on or after 01 April 2009.

The municipality has adopted the standard for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.21 GRAP 9: Revenue from Exchange Transactions**

The definition of revenue in terms of GRAP 9 incorporates the concept of service potential. Revenue is the gross inflow of economic benefits or service potential when those inflows result in an increase in net assets, other than increases relating to contributions from owners. Entities may derive revenue from exchange or non-exchange transactions.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**

**NEW STANDARDS AND INTERPRETATIONS**

An exchange transaction is one in which the entity receives resources or has liabilities extinguished, and directly gives approximately equal value to the other party in exchange. Non-exchange revenue transaction is a transaction where an entity receives value from another entity without directly giving approximately equal value in exchange.

An entity recognises revenue when it is probable that economic benefits or service potential will flow to the entity, and the entity can measure the benefits reliably.

GRAP 9 clarifies that this Standard only applies to revenue from exchange transactions. Other than terminology difference, there is no effect on initial adoption of Standard on GRAP 9. The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires retrospective application of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospective application of the Standard.

The effective date of the standard is for years beginning on or after 01 April 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. The relevant accounting policy on revenue is in line with this interpretation.

**2.22 GRAP 10: Financial Reporting in Hyperinflationary Economies**

GRAP 10 includes additional guidance as adopted from Financial Reporting in Hyperinflationary Economies (IFRIC 7) on Applying the Restatement Approach.

The initial application of GRAP 4 will have no impact on the annual financial statements.

The effective date of the standard is for years beginning on or after 01 April 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

**2.23 GRAP 11: Construction Contracts**

The definition for "construction contract" was expanded by including a binding arrangement that do not take the form of a legal contract within the scope of the Standard.

Definition for "cost plus or cost based contract" has been expanded to include commercially-based contract.

The scope has been expanded to include cost based and non-commercial contracts.

Public entities need to review contracts to determine whether they fall within the scope of the Standard based on the above changes.

GRAP 11 incorporates the concept of service potential in the condition to determine whether the outcome of a construction contract can be estimated reliably. The requirement to recognise an expected deficit on a contract immediately when it becomes probable that contract costs will exceed total contract revenue applies only to contracts in which it is intended at the inception of the contract that contract costs are to be fully recovered from the parties to that contract (par.47).

Other than the above requirements, there is no other effect on initial adoption of GRAP 11.

The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires retrospective application of this Standard.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospect application of the Standard.

The effective date of the standard is for years beginning on or after 01 April 2009.  
The municipality has adopted the standard for the first time in the 2010 annual financial statements. The interpretation has no impact on the current financial statements.

**2.24 GRAP 12: Inventories**

GRAP 12 includes the definition of current replacement costs as the cost the entity would incur to acquire the asset on the reporting date. GRAP 12 also includes the principal of service potential associated with the item that will flow to the entity as part of recognition criteria for inventories as well as the concept of goods purchased or produced for distribution at no charge or for a nominal consideration, which is specific to the public sector.

Initial measurement is required at cost (an exchange transaction) and where inventories are acquired at no cost or nominal consideration (non-exchange transaction), their cost shall be their fair value at acquisition date. Subsequent measurement shall be at lower of cost and net realisable value except if inventories are held for:

- o distribution at no charge or for a nominal charge, or
- o consumption in the production process of goods to be distributed at no charge or for a nominal charge.

If the above applies then subsequent measurement shall be at the lower of cost or current replacement cost. The retail method of measurement of cost is excluded from GRAP 12.

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires retrospective application of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospective application of the Standard. However, entities are not required to measure inventories in accordance with the requirements of the Standard for reporting periods beginning on or after a date within three years following the date of initial adoption of the Standard.

The effective date of the standard is for years beginning on or after 01 April 2009.  
The municipality has adopted the standard for the first time in the 2010 annual financial statements. The interpretation has no impact on the accounting policies already adopted..

**2.25 GRAP 13: Leases**

GRAP 13 incorporates additional guidance on the concept of substance and legal form of a transaction, to illustrate the difference between lease and other contracts and on operating lease incentives.

## **GREATER GIYANI MUNICIPALITY**

### **Annual Financial Statements for the year ended 30 June 2011**

In certain circumstances, legislation may prohibit the entering into certain types of lease agreements. If the entity has contravened these legislative requirements, the entity is still required to apply the requirements of GRAP 13. Other than the abovementioned requirements, there is no other impact on the initial adoption of GRAP13. The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires retrospective application of the Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard.

Where items have not been recognised as a result of transitional provisions under the Standard of GRAP on Property, Plant and Equipment, the recognition requirements of the Standard would not apply to such items until the transitional provision in that Standard expires.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospective application of the Standard. Where items have not been recognised as a result of transitional provisions under the Standard of GRAP on Property, Plant and Equipment or the Standard of GRAP on Agriculture, the recognition requirements of the Standard would not apply to such items until the transitional provision in that Standard expires.

The effective date of the standard is for years beginning on or after 01 April 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. The interpretation has no impact on the accounting policies adopted.

#### **2.26 GRAP 14: Events after the reporting date**

An event, which could be favourable or unfavourable, that occurs between the reporting date and the date the annual financial statements are authorised for issue. GRAP 14 requires the date of authorisation for issue is the date on which the annual financial statements have received approval from management to be issued to the executive authority or municipal council.

Two types of events can be identified:

- o those that provide evidence of conditions that existed at the reporting date adjusting events after the reporting date); and
- o those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).
- o

An entity shall adjust the amounts recognised in its annual financial statements to reflect adjusting events after the reporting date.

An entity shall not adjust the amounts recognised in its annual financial statements to reflect non-adjusting events after the reporting date.

The effective date of the standard is for years beginning on or after 01 April 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. It is unlikely that the interpretation will have an impact on the current financial statements.

#### **2.27 GRAP 16: Investment Property**

Investment property includes property held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of an entity's operations. GRAP 16 states that the use of property to provide housing as a social service does not qualify as investment property even though rentals are earned.

## GREATER GIYANI MUNICIPALITY

Annual Financial Statements for the year ended 30 June 2011

### NEW STANDARDS AND INTERPRETATIONS

At initial recognition, investment property is measured at cost including transaction costs. However, where an entity acquires investment property through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition. The cost of self-constructed investment property is the cost at date of completion.

After initial recognition, entities can carry investment property at either the fair value (fair value model) or cost less accumulated depreciation and accumulated impairment (cost model). An entity is required to disclose the fair value of investment property if the cost model is used. When an entity carries investment properties at fair value, the fair value needs to be determined at every reporting date. Gains or losses arising from changes in fair value are included in surplus or deficit for the period in which they arise. The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires retrospective application of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospective application of the Standard. However, entities are not required to measure investment properties in accordance with the requirements of the Standard for reporting periods beginning on or after a date within three years following the date of initial adoption of the Standard.

The effective date of the standard is for years beginning on or after 01 April 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. In the current financial year, the standard is not relevant to the municipality's operations.

#### 2.28 GRAP 17: Property, Plant and Equipment

GRAP 17 does not require or prohibit the recognition of heritage assets but if an entity recognises heritage assets the entity needs to comply with GRAP 17 disclosure requirements. Additional commentary has been included in to clarify the applicability of infrastructure assets to be recognised in terms of GRAP17. Where an entity acquires an asset through a non-exchange transaction, i.e. for a nominal or no consideration, its cost is its fair value as at the date of acquisition. The disclosure requirement for temporarily idle, fully depreciated property, plant and equipment and for property, plant and equipment that are retired from active use is required in GRAP 17 whereas IAS 16 only encourages this disclosure. The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires retrospective application of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard. However, entities that applied the transitional provisions in the Standard of GAMAP on Property, Plant and Equipment may continue to take advantage of those transitional provisions until they expire.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospective application of the Standard. However, entities that applied the transitional provisions in the Standard of GAMAP on Property, Plant and Equipment may continue to take advantage of those transitional provisions until they expire. Entities are also not required to measure classes of Property, Plant and Equipment in accordance with the requirements of the Standard for reporting periods beginning on or after a date within three years following the date of initial adoption of the Standard.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**

**NEW STANDARDS AND INTERPRETATIONS**

The effective date of the standard is for years beginning on or after 01 April 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. The relevant policy on property, plant and equipment is in line with this standard.

**2.29 GRAP 18: Segment Reporting**

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the entity. The major classifications of activities identified in budget documentation will usually reflect the segments for which an entity reports information to management. Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of an entity that provides specific outputs or achieves particular operating objectives that are in line with the entity's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by an entity within a particular region.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions, states that no comparative segment information need to be presented on initial adoption of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities states that no comparative segment information need to be presented on initial adoption of the Standard. Where items have not been recognised as a result of transitional provisions under the Standard of GRAP on Property, Plant and Equipment, recognition requirements of this Standard would not apply to such items until the transitional provision in that Standard expires.

Directive 4 - Transitional provisions for medium and low capacity municipalities states that no comparative segment information need to be presented on initial adoption of the Standard. Where items have not been recognised as a result of transitional provisions under the Standard of GRAP on Property, Plant and Equipment and the Standard of GRAP on Agriculture, the recognition requirements of the Standard would not apply to such items until the transitional provision in that standard expires.

The effective date of the standard is for years beginning on or after 01 April 2011.

The municipality expects to adopt the standard for the first time in the 2012 annual financial statements. It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

**2.30 GRAP 19: Provisions, Contingent Liabilities and Contingent Assets**

GRAP 19 exclude from its scope those provisions and contingent liabilities arising from social benefits for which it does not receive consideration that is approximately equal to the value of goods and services provided directly in return from the recipients of those benefits. For the purpose of GRAP 19, social benefits refers to goods, services and other benefits provided in the pursuit of the social policy objective of a government. This Standard includes guidance on the accounting of these social benefits. Outflow of resources embodying service potential also needs to be considered in when assessing if a present obligation that arises from past events exists or not.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

The Standard includes accounting for obligations to make additional contributions to a fund. This is similar to the requirements of IFRIC5 (AC438). It further includes the accounting for the changes in existing decommissioning, restoration and similar liabilities. This is similar to the requirements of IFRIC1 (AC434).

GRAP 19 give specific guidance regarding restructuring by way of transfers that will take place under a government directive and will not involve binding agreements. An obligation exists only when there is a binding transfer agreement. Additional disclosure for each class of provision regarding reductions in the carrying amounts of provisions that result from payments or other outflows of economic benefits or service potential made during the reporting period and reductions in the carrying amounts of provisions resulting from re-measurement of the estimated future outflow of economic benefits or service potential, or from settlement of the provisions without cost to the entity. If an external valuation is used to measure a provision the information relating to the valuation can usefully be disclosed.

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires retrospective application of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard.

However, where items have not been recognised as a result of transitional provisions under the Standard on Property, Plant and Equipment, the recognition requirements of the Standard on Provisions, Contingent Liabilities and Contingent Assets would not apply to such items until the transitional provisions in that Standard expire.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires retrospective application of the Standard. However, where items have not been recognised as a result of transitional provisions under the Standard on Property, Plant and Equipment, the recognition requirements of the Standard on Provisions, Contingent Liabilities and Contingent Assets would not apply to such items until the transitional provisions in that Standard expire.

The effective date of the standard is for years beginning on or after 01 April 2009.

The municipality has adopted the standard for the first time in the 2010 annual financial statements. The relevant policy on provisions, contingent liabilities and contingent assets is in line with this interpretation.

**2.31 GRAP 23: Revenue from Non-exchange Transactions**

Revenue from non-exchange transactions arises when an entity receives value from another entity without directly giving approximately equal value in exchange. An asset acquired through a non-exchange transaction shall initially be measured at its fair value as at the date of acquisition. This revenue will be measured at the amount of increase in net assets recognised by the entity.

An inflow of resources from a non-exchange transaction recognised as an asset shall be recognised as revenue, except to the extent that a liability is recognised for the same inflow. As an entity satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it will reduce the carrying amount of the liability recognised as an amount equal to that reduction.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2010.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

The municipality expects to adopt the standard for the first time in the 2011 annual financial statements. It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

**2.32 GRAP 24: Presentation of Budget Information in the Financial Statements**

Subject to the requirements of paragraph .19, an entity shall present a comparison of the budget amounts for which it is held publicly accountable and actual amounts either as a separate additional financial statement or as additional budget columns in the financial statements currently presented in accordance with Standards of GRAP. The comparison of budget and actual amounts shall present separately for each level of legislative oversight:

- o the approved and final budget amounts;
- o the actual amounts on a comparable basis; and
- o by way of note disclosure, an explanation of material differences between the budget for which the entity is held publicly accountable and actual amounts, unless such explanation is included in other public documents issued in conjunction with the financial statements, and a cross reference to those documents is made in the notes.

Where an entity prepares its budget and annual financial statements on a comparable basis, it includes the comparison as an additional column in the primary annual financial statements. Where the budget and annual financial statements are not prepared on a comparable basis, a separate statement is prepared called the 'Statement of Comparison of Budget and Actual Amounts'. This statement compares the budget amounts with the amounts in the annual financial statements adjusted to be comparable to the budget.

A comparable basis means that the budget and annual financial statements:

- o are prepared using the same basis of accounting i.e. either cash or accrual;
- o include the same activities and entities;
- o use the same classification system; and
- o are prepared for the same period.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance. The effective date of the standard is for years beginning on or after 01 April 2010. The municipality expects to adopt the standard for the first time in the 2011 annual financial statements. It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

**2.33 GRAP 100: Non-current Assets Held for Sale and Discontinued Operations**

GRAP 100 includes in its scope the reference to non-cash generating assets. It further includes definitions relevant to the understanding of the Standard e.g. "Non-cash-generating assets" are assets other than cash-generating assets and "value in use of a non-cash-generating asset" is the present value of the asset's remaining service potential. GRAP 100 excludes from the description of a discontinued operation reference to a subsidiary acquired exclusively with a view to resale.

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires prospective application of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires prospective application of the Standard.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

However, the Standard would not apply to those items that have not been recognised as a result of the transitional provisions under the Standard of Property, Plant and Equipment until the transitional provision in that Standard expires.

Directive 4 - Transitional provisions for medium and low capacity municipalities requires prospective application of the Standard. However, the Standard would not apply to those items that have not been recognised as a result of the transitional provisions under the Standards of GRAP on Inventories, Investment Property, Property, Plant and Equipment, Agriculture and Intangible Assets until the transitional provision in that Standard expires.

The effective date of the standard is for years beginning on or after 01 April 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. The interpretation has no impact on the accounting policies adopted.

**2.34 GRAP 101: Agriculture**

GRAP 101 excludes guidance on accounting for non-exchange revenue from government grants related to a biological asset as GRAP 23 on Revenue from Non-Exchange Transactions will provide such guidance. Recognition requirement includes the concept of the probable flow of service potential.

Biological assets acquired at no or for a nominal value shall be measured on initial recognition and at each reporting date at its fair value less estimated point-of-sale costs. Additional disclosure is required of biological assets for which the entity's use or capacity to sell is subject to restrictions imposed by regulations that have a significant impact on their total fair value less estimated point-of-sale costs.

In the reconciliation of changes in the carrying amount of biological assets between the beginning and the end of the current period it is also required to disclose increases or decreases due to transfers. The following Directives also need to be considered:

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires retrospective application of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires any adjustments required to the previous carrying amounts of assets and net assets shall be recognised as an adjustment to the opening balance of accumulated surplus or deficit in the period that the Standard initially adopted. Comparative information is not required to be restated on initial adoption of this Standard.

Directive 4 - Transitional provisions for medium and low capacity requires any adjustments required to the previous carrying amounts of assets and net assets shall be recognised as an adjustment to the opening balance of accumulated surplus or deficit in the period that the Standard is initially adopted. Comparative information is not required to be restated. Entities are not required to recognise biological assets and/or agricultural produce for reporting periods beginning on or after a date within three years following the date of initial adoption of this Standard.

The effective date of the standard is for years beginning on or after 01 April 2009. The municipality has adopted the standard for the first time in the 2010 annual financial statements. The interpretation has no impact on the accounting policies previously adopted.

**2.35 GRAP 102: Intangible Assets**

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

GRAP 102 excludes guidance on accounting for intangible assets acquired as part of an entity combination and in-process research and development costs acquired in an entity combination. Recognition requirement includes the concept of the probable flow of service potential. GRAP 102 distinguishes between impairment loss of cash generating and non-cash-generating assets. Intangible assets acquired at no or for a nominal cost shall be measured on acquisition date at its fair value.

In GRAP 102 the identifiability criterion in the definition of an intangible asset has been expanded to include contractual rights arising from binding arrangements, and to exclude rights granted by statute. Additional guidance included in GRAP 102 to explain that distinction should be made between assets associated with the item of property, plant and equipment and the intangible asset.

Guidance on web site costs has been included in GRAP 102 from SIC Interpretation 32 Intangible Assets – Web Site Costs. Guidance on intangible assets that may be acquired in exchange for non-monetary assets, where the exchange transaction lacks commercial substance has not been included in GRAP 102 as guidance to be included in GRAP 23. GRAP 102 does not state "gains shall not be classified as revenue" as GRAP term "income" has a broader meaning than the term "revenue".

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions requires retrospective application of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities requires retrospective application of the Standard. Where entities have, on initial adoption of the Standard, accumulated and retained sufficient information about costs and the future economic benefits or service potential related to intangible assets that may have been expensed previously, those intangible assets should be recognised in accordance with the Standard.

Directive 4 - Transitional provisions for medium and low capacity requires retrospective application of the Standard. Where entities have, on initial adoption of the Standard, accumulated and retained sufficient information about costs and the future economic benefits or service potential related to intangible assets that may have been expensed previously, those intangible assets should be recognised in accordance with the Standard. Entities are not required to measure intangible assets for reporting periods beginning on or after a date within three years following the date of initial adoption of the Standard of GRAP on Intangible Assets. The effective date of the standard is for years beginning on or after 01 April 2009.

The municipality has adopted the standard for the first time in the 2010 annual financial statements. The interpretation has no impact on the accounting policies previously adopted.

### **2.36 GRAP 103: Heritage Assets**

An entity assesses the probability of each transaction on an individual basis when it occurs. Entities shall not assess the probability on an overall level based on the payment history of recipients of the service in general when the probability of revenue is assessed at initial recognition. The full amount of revenue will be recognised at initial recognition. Assessing impairment is an event that takes place subsequently to initial recognition. Such impairment is an expense. Revenue is not reduced by this expense.

The effective date of the interpretation is for years beginning on or after 01 April 2010. The municipality expects to adopt the interpretation for the first time in the 2011 annual financial statements. The interpretation has no impact on the municipality's annual financial statements.

**GREATER GIYANI MUNICIPALITY**  
**Annual Financial Statements for the year ended 30 June 2011**  
**NEW STANDARDS AND INTERPRETATIONS**

**2.37 IGRAP 1: Interpretation of GRAP: Applying the Probability Test on Initial Recognition of Exchange Revenue**

The method of measurement of value in use of a non-cash-generating asset under this Standard is different to that applied to a cash generating asset. Asset should be measured by reference to the present value of the remaining service potential of the asset. Determining value in use (present value of remaining service potential) of a non-cash-generating asset, may be the depreciated replacement cost approach, restoration cost approach and service units approach. This Standard does not require entities to apply an impairment test to property, plant and equipment carried at revalued amounts. This Standard does not include a decrease in market value significantly greater than would be expected as a result of the passage of time or normal use as a minimum indication of impairment. This indication is included as an additional indication that impairment may exist. The interpretation has no impact on the accounting policies previously adopted.

The effective date of the standard is for years beginning on or after 01 April 2010.  
The municipality expects to adopt the standard for the first time in the 2011 annual financial statements..

**2.38 IPSAS 21: Impairment of Non Cash-Generating Assets**

IPSAS 20 specifically excludes any consideration provided to key management personnel solely as a reimbursement for expenditure incurred by those individuals for the benefit of the reporting entity.

The effective date of the standard is for years beginning on or after 01 April 2009.  
The municipality has adopted the standard for the first time in the 2010 annual financial statements. The interpretation has no impact on the accounting policies previously adopted.

3.4 The municipality opted to take advantage of Directive 4 issued by the Accounting Standards Board in March 2009, paragraphs .71 to .83, which allows a period of 3 years from the date of initial adoption of GRAP 17 to comply in full with the recognition requirements of that Standard.

Land and buildings include administrative offices and municipal houses located in various sections of Gyani township. Land and buildings were valued by MOD HOPE Property Valuers, registered independent valuers. The last valuation was performed as part of the general valuation of all properties within the municipal area for the compilation of the valuation roll in terms of the Municipal Property Rates Act (Act no. 6 of 2004), and approved for implementation by Council with effect from 01 July 2008

GREATER GIYANI MUNICIPALITY  
Annual Financial Statements for the Year Ended 30 June 2011  
NOTES TO ANNUAL FINANCIAL STATEMENTS

	2011	2010
<b>Inventories</b>		
Consumable stores	678 175	400 556
Closing values were determined through internal valuation, taking into account current prices and the condition of stock items.		
<b>Trade and other receivables</b>		
Made up of:		
Staff debtors	5.1 48 464	339 655
Sundry debtors	5.2 3 822 511	195 000
Sundry debtors provision	-195 000	-195 000
	3 476 975	339 656
1.1 Staff debtors relate to amounts owed by councillors arising from exceeding cellphone limits on the VODACOM group subscription. A cellphone contract with VODACOM was based on the cellphone allowances of councillors, but the contract was not implemented as agreed by the service provider to ensure that limits are not exceeded. The recovery of the amounts still owing is in progress.		
1.2 Sundry debtors		
Sundry debtors comprise -		
Balance- beginning of the year	3 622 511	195 000
Debtors for Fraudulent bank transaction(2005/2006)	195 000	195 000
	195 000	195 000
Balance - Beginning of the year previously stated	3 622 511	195 000
Recognition of Debtors for auction sale(2007/2008):		
Gross sale	3 427 511	3 427 511
Cash received from auctioneer	4 016 500	4 016 500
Restated Balance-beginning of the year	-588 989	-588 989
Balance - end of the year	3 622 511	3 622 511
An auction of parcels of land was conducted by Tlhwani auctioneers in the 2007/2008 financial year. The revenue from the auction and the corresponding receivables were not recognised in the books of the municipality. An amount of R588989 transferred to the municipality was also incorrectly recognised as a liability towards the auctioneer pending the transfer to buyers. The transactions were correctly recognised in the current financial year and comparative balances restated accordingly.		
<b>VAT receivable</b>		
VAT receivable mainly comprises VAT raised on customer billing for services (i.e. accrual basis) but accounted for on cash basis and this resulted in less VAT claimable.		
Output VAT on supplies	-658 160	1 621 360
Input VAT on purchases	28 545 733	22 450 870
VAT recoveries	-14 112 788	-6 768 984

NOTES TO ANNUAL FINANCIAL STATEMENTS

	2011	2010
Capital expenditure		
Opening bal	-	2 608 328
Condoned by Council	-	-2 608 328
Current year disclosures	-	-
Closing bal	-	-

PRIOR YEAR unauthorised expenditure is attributable to budgeting inaccuracies on individual votes. The overall budget reflects 10% underspending. Budget/ actual expenditure comparison. The expenditure was tabled to Council for condonation.

30 Irregular expenditure		
30.1 SCM requirement not fully complied with in the prior year	-	9 210 090
Excess avialment on councillors cellphone contract (prior years)	48 464	330 665
	48 464	9 549 755
Opening bal	9 549 755	19 104 567
Condoned by Council	-9 549 755	-19 104 567
Current year disclosures	-	9 549 755
Closing bal	-	9 549 755

In the PRIOR YEAR, Adjudication Committee minutes fell short of demonstrating that a member of the Evaluation Committee who signs the attendance register of the Adjudication Committee meeting only presents the bid evaluation report and gets excused from the proceedings, and does not participate in the actual consideration of the bid by the Adjudication Committee. The inference drawn by audit is that the member actually influences the outcomes of two bid committees in contravention of the SCM regulations. The total contract amounts involved in the affected tender awards is R9,210,090 over the duration of the projects. The expenditure was tabled to Council for condonation in the current financial year.

Cellphone expenses for councillors exceeded the allowance limits due to failure of the service provider to implement the agreement correctly. The excess amount collected money from the municipality's bank account through a debit order. With the exception of the balance reflected above, the amount was recovered from the respective councillors in the current financial year. Action to recover the outstanding amount is in progress, and the municipality considers the amount to be fully recoverable.

30.2 Fruitless and wasteful expenditure

Penalties on late payment to SARS	-	-
Penalties on late payment to ESKOM	19 417	19 417
Fraudulent bank transaction	195 000	165 000

Closing bal	307 412	214 417

The municipality suffered a loss of R195,000 through a scam involving the use of a fraudulent bank transaction by a fictitious company masquerading as Bafalon International in the 2005/2006 financial. The amount is fully provided for in the financial statements, however Council has rescinded an earlier resolution to write off the amount against the provision in order to allow the investigation of the case to continue.

Legal charges and interest were incurred arising from the cessations with Vuka Khulani Timber and OSZ Tayob trading as EH Hassim, which were not honoured by the municipality.

Legal costs on dishonoured cessation agreement

31 Additional disclosures in terms of the MFMA

31.1 In terms of section 36/ MFMA regulations, any deviation from the SCM policy should be approved or condoned by the accounting officer. In the PRIOR YEAR, deviations from the normal SCM processes in the following incidents were approved by the accounting officer on grounds of urgency and duly tabled to Council.

Incident	CY amounts	PY amounts
Purchase of mayoral vehicle	-	551 040
Development of asset register	-	1 100 000
Rehabilitation of Giyani testing station	-	884 667
Upgrade of IT network	-	413 392
Completion of Giyani section A road	-	820 178

31.2 Disclosure is hereunder made in terms of the MFMA (Section 114), in terms whereof if a tender other than the one recommended in the normal course of implementing the SCM policy is approved, the accounting officer must, in writing, notify Auditor-General, the relevant Provincial Treasury and National Treasury of the reasons for deviating from such recommendations. With regards to the CURRENT YEAR, the deviations were tabled to Council and the relevant offices duly notified in writing.

	971 918	8 036 411

The municipality administers the vehicle registrations function on behalf of the Provincial Transport Department for an agency fee of 20% on total receipts. The revenue collected by the municipality on the water services provision function (which comprises water and sewerage services provision) is retained by the municipality as agency fee in terms of the SLA.

**Contingent liability**

75000

The Municipality is currently defending a case against Miltec Catering. The matter being defended relates to an unpaid claim for catering made to the municipality which, according to the municipality, did not meet the quality requirements as per order specification. According to the municipality's lawyers an amount of R75000 is likely to be incurred in settlement due to unavailability of witnesses for the municipality.
